

**PROJECT 1000:
HOW SHISE & AGEBA'S CHILDRENS FOUNDATION
DISTRUTUBUTED FACE SHIELD AND MASKS TO
CHILDREN OF POOR COMMUNITIES IN NIGERIA.**

The world as we view it today is not as we foresaw. Globally, all hands are on deck to combat a common enemy- The Corona Virus, a pandemic responsible for huge losses to both people and businesses. Indeed, out of every ongoing global issue, COVID-19 is at the front burner for global priority. The Pandemic has affected everyone at different levels; while some get it tough, others don't survive it at all. However, in all these, the question that comes to mind for us remains – what is the fate of vulnerable children?

In every society, the worst affected in times like this are women and children; the most vulnerable being underserved children. According to statistics, in Nigeria, about 60% of children in poor communities live below minimum standard. Consequently, this makes them susceptible and vulnerable to contracting the COVID-19 virus if exposed. Even though Children are the future sadly, if that future is wiped out today because of their inability to access and apply safety measures, what hope do we then have as a nation?

It is in the light of the foregoing that Shise and Ageba's children's foundation deemed it necessary to distribute face shields, nose masks as well as promote good hygiene in some selected poor communities in Nigeria. This gesture was aimed at propagating COVID-19 mitigations towards protecting the health rights of vulnerable children.

Through crowd funding videos and letters, the foundation got contributions from kind-hearted donors across the world. The kind support of these amazing donors made the realization of Project 1,000 face shield and

nose masks a huge success.

Currently, we have been able to

distribute face masks and face shields to internally displaced persons camps and their Host communities in Bama and Gwoza, Borno State. According to Sheriff – one of the children at the

IDP camp in Gwoza, Borno State “My excitement knows no bound, now I can protect myself from contacting COVID-19”

primary schools in Delta state. In Abuja, the foundation also distributed face masks and face shields to the children at Charity, Faith and Hope Orphanage Home situated in Apo Dutse – a suburb area in FCT.

The foundation also partnered with James Hope College Foundation Agbor, Delta State to distribute face masks and face shields across five (5) government

While we remain ever grateful to our donors and field volunteers whose immense contribution towards the success of this project are immeasurable, Shise and Ageba's Children's Foundation hopes to protect more children from

contracting the COVID-19 virus by spreading our advocacy and humanitarian aid tentacles to children in other states of the country. We believe that with your continual aid as well as that of other well-meaning individuals, entities and bodies, the risk of many children contracting the COVID-19 virus, especially those in rural and insurgent states will be reduced greatly.
